## General Comment

Hello,

Please don't restrict options trading in our IRA accounts. I've taken the time to learn proper options trading. Options trading has grown my retirement account and helped me recover losses. Some option trades actually reduce risk, rather than increase it. You can purchase options on a stock position as insurance if the stock should go down. Or you can sell options on good quality stocks to get the income from that and if you end up buying the underlying stock, you're okay with that because you were able to profit from the sale of the option and now you have a high quality stock in your portfolio. Again, please do not take away our ability to trade options in our IRA accounts.

Thank you for all you do.

Eric
